

**Major UK University Streamlines IP Management and Boosts IT Productivity with EfficientIP Solution**

- DDI solution achieves 55 percent ROI with payback in 11 months and average annual benefit of \$24,000
- Nucleus Research finds improved network infrastructure management enhances business efficiency

**West Chester – September 3rd, 2015** – EfficientIP has helped a major UK university improve its network infrastructure management to greatly enhance business efficiency and automate strategic IT operations. The university has achieved a 55 per cent return on investment, with payback in less than one year.

An in-depth case study by Nucleus Research details the benefits and how the university achieved such positive results.

“With EfficientIP, the university was able to leapfrog from a legacy application that hit the end of its lifecycle to a current solution that boosts IT staff productivity and reduces network vulnerabilities. More than your standard upgrade, this was a quantum leap forward for the university,” said Rebecca Wettemann, VP of research, Nucleus Research.

EfficientIP’s unified management framework for network configurations and DNS, DHCP and IPAM devices help to enhance security, networks availability and agility of the infrastructure. For this UK University, the EfficientIP solution significantly reduced hardware costs while delivering new capabilities, such as workflow automation. This led to strong ROI, quick payback and considerable increase in IT productivity.

“Network management is about improving operations, streamlining business and ultimately contributing to the bottom line,” said David Williamson, CEO, EfficientIP. “We help customers worldwide to reduce operating costs, increase management efficiency and improve network security.”

The UK University joins a growing list of organizations that have improved operations, lowered costs and enhanced security with EfficientIP.
