

# 5 Steps for a Successful Network Automation Journey

## PREPARE

- ▣ List your business drivers
- ▣ Highlight main challenges
- ▣ Identify previous automation projects

## START SMALL

- ▣ Focus on datacenter network domain
- ▣ Identify quick wins  
*Ex: change management, anomaly detection...*

## NURTURE

- ▣ Measure achieved benefits
- ▣ List essential tools e.g. NSoT<sup>1</sup>
- ▣ Leverage DDI<sup>2</sup> to amplify benefits up to 62%

## ITERATE & SCALE

- ▣ Apply to broader initiatives  
*Ex: security incident remediation, provisioning, policy rollout*

## STANDARDIZE

- ▣ Document lessons learned
- ▣ Review best practices
- ▣ Build your Network Automation roadmap
