

# 2026 DNS THREAT INTELLIGENCE REPORT

Uncovering Staged Attacks

## Why You Need DNS Threat Intelligence

Attackers operate at machine speed through staged attacks using dormant domains and automated infrastructure

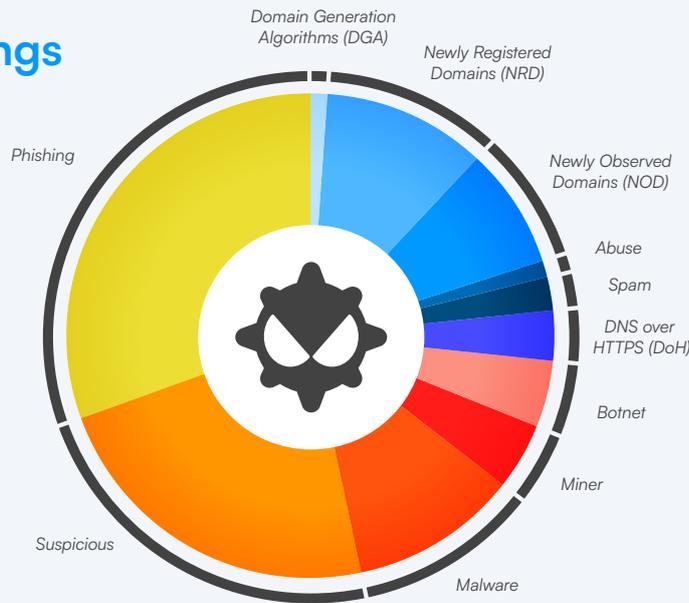

**DNS** is now a leading indicator of **emerging attacks** and a critical source of **Threat Intelligence (TI)**

Insights gained from **daily processing** of:

**150B** DNS transactions  
**500k** NODs

## Report Findings

Real attack evidence of how malicious infrastructure is prepared and activated

## Phishing Insights

Targeted sectors  
Top Targets  
Campaigns

## DGAs Identified

Orchard  
EconoMimics  
Phobia

## Malware Discovered

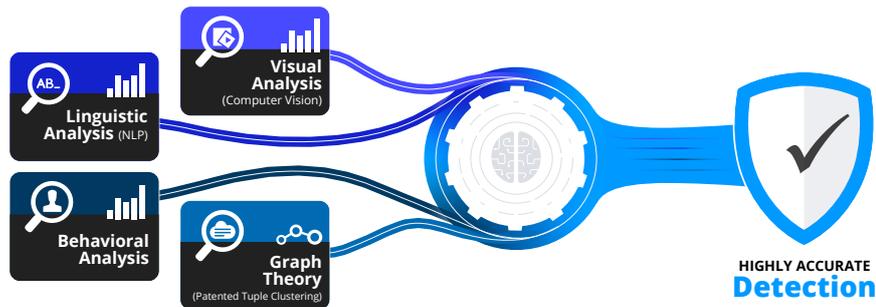

DNS Zero-Day  
Infostealer  
ViperSoftX Variants

## EfficientIP DNS TI Platform

Continuous analysis of DNS telemetry

*Highly accurate detection via unification of multiple AI-models*

## How to Stay Ahead of Attacks

- 1 Leverage DNS as an early TI layer
- 2 Apply AI-driven detection models
- 3 Protect using DNS TI feeds
